ESG rate 0-100 Percentile rank in full universe	A to D: position in ESG rating a to d: controversy intensity +/-: risk mitigation (controversy & greenwashing)	Ranking in full universe of 14402 companies (change from last month)	Ranking in industry (change from last month) Companies in industry: 295

Tesla Inc registers a fair ESG performance with a grade of B translating into an ESG rate of 56 (top 18% in full universe). The 'd' translates a very high controversy intensity at 94. As the controversy score is above the ESG rate, and as the greenwashing risk indicator is high, the risk is not mitigated ("-").

	Rate 0-100	Disclosure	Reputation	Greenwashing
ESG	56	66	47	
Environment	70	61	80	Low
Social	45	64	25	High
Governance	54	74	34	Medium
Controversy	94	The controversy score reflects the intensity of current controversies		

Legend: ESG rate · Disclosure · Reputation · Controversy
The ESG rate integrates data publicly reported and communicated by companies (disclosure), and narrative content reflecting the perceptions of stakeholders such as the media and NGOs (reputation). The heatmap above shows how the company performs in the Environment, Social and Governance categories. The greenwashing risk indicator is obtained by comparing forward-looking and backward-looking news sentiment. On page 2, similar charts are presented for the 11 dimensions distributed in the E, S, and G categories. The final ESG rate is derived from the average of the rates measured for each dimension. The scatter below represents the full universe (light blue) as well as industry peers (dark blue). It compares the company with the industry leader and laggard.

Company in universe

Sensitive activities
Activities	Revenue	> 5%
GMO products		
Nuclear		
Nuclear Production		
Alcohol		
Tobacco		
Armaments		
Cluster Bombs		
Landmines		
Gambling		
Pornography		
Contraceptives		
Abortifacients		
Embryonic Stem Cell Research		
Animal Testing		

If the company generates revenues from a sensitive activity, the latter is bolded in black with an X. A second X signifies that the activity represents more than 5% of total revenues.

To produce the SDG mapping below, the ESG data has been filtered and recoded with the Sustainable Development Goals (SDGs) ; the 5 SDGs with the largest volume of reputation data are displayed with larger bubbles and labels. The bar chart shows the major positive (green) and negative (red) topics and keywords found in the news last month.
